

DATASHEET

## Sage Intelligent Time

*AI-powered timesheets for continuous, accurate, and complete insights to profitably manage your service business*

### Unprecedented speed and accuracy for timesheets

Whether you bill time to clients or offer fixed price projects, accurate time entry is critical to managing your profitability. Just an hour per employee per week of lost time can add up to \$10,000 in lost revenue. Sage Intelligent Time is an AI-powered virtual time assistant that revolutionizes time entry. With accurate, real-time time entry, finance and operations can increase revenue, price more accurately, streamline billing, and manage resources more effectively.

You also relieve your service professionals from soul-crushing time entry and free your finance team from playing timesheet cop.

Traditional timesheets	Sage Intelligent Time
<p>Professionals often spend one or more hours per week tediously reconstructing their activity for their timesheet.</p>	<p>A personal Time Assistant gathers all activity for the professional and presents it to them to review.</p> <p>It's easy for the professional to review—it can be done on their mobile device while waiting in line for coffee. Even better, the Time Assistant gets smarter with every review, saving the professional more and more time.</p>
<p>For busy professionals focused on clients, it's unrealistic to manually capture every minute of time, resulting in reduced utilization, billable revenue, and profitability.</p>	<p>Professionals focus on the customer instead of the minutiae of timesheets. Every minute of time is collected, increasing the professional's utilization, billable time, and providing a precise picture of project profitability.</p>

Traditional timesheets	AI-powered timesheets
Homegrown or third-party time solutions are disconnected, requiring extra reconciliations and causing out-of-sync issues that limit scalability.	Timesheets are always in sync and reconciled with your financials so you can efficiently scale your business.
Timesheet data that's only available weekly or bi-weekly, and often late late, delays the close and insights needed to manage profitability and project resourcing.	You get continuous insights that allow you to close on time, bill on time, and let project managers to make financially-minded decisions about their projects.

*The Time Assistant reconstructs your professional's activities for them and gets smarter every time using artificial intelligence. The Time Assistant collects every minute for more accurate project billing, profitability measurement, and resource management.*

The screenshot displays the Sage Intelligent Time interface. On the left, the desktop view shows a sidebar with 'Activities' categorized into 'Unassigned' and 'Assigned'. The main area is split into 'Time Entries' and a summary table. The 'Time Entries' table lists activities with columns for Customer, Project, Task, Department, Location, Billable status, and hours for Monday and Tuesday. The summary table at the top right shows: TOTAL HOURS: 18.25, TOTAL BILLABLE: 12.25, TOTAL NONBILLABLE: 6.00, and STATUS: Draft.

On the right, a mobile app view shows the 'Activities' screen with a list of tasks and their durations, including 'Computer Activity' (0.25), 'Slack | Bioclear-CPQ | Skyline' (0.25), 'BioClear - Research' (0.83), 'BioClear - Crunchbase Compa...' (0.43), 'CPQ Solution Design - Bioclear ...' (2.00), and 'Email Activity' (0.13).
